Discover Bulgin's Buccaneer® 7000 Series at Southern Manufacturing & Electronics 2014

Elektron Technology will be showcasing the latest addition to Bulgin's Buccaneer® range of dust and waterproof mains power connectors at Southern Manufacturing & Electronics 2014 at FIVE in Farnborough on the 12th and 13th of February.

Visitors to **Stand K45** will discover the Buccaneer 7000 Series of environmentally-sealed connectors for mains power applications. Designed to offer rapid and secure connectivity in harsh environments, the compact, 25A and 600V rated Buccaneer 7000 provides excellent sealing characteristics to IP67, IP68 and IP69K standards. Each connector features a unique twist locking system with positive feedback for 'fit and forget' connectivity, with a choice of fully interchangeable nickel plated, cast zinc alloy or UV-resistant, UL94-V0 flammability-rated plastic bodies. Available in 2, 3, 8, 16 and 32 pole options, the Buccaneer 7000 Series provides engineers and designers have the greatest possible flexibility in system design.

Elektron Technology will also be giving delegates the opportunity to learn about the extensive portfolio of Arcoelectric products. A sister company to Bulgin, Arcoelectric is a specialist manufacturer of appliance switches, indicator lights and fuseholders for almost any application, from computers and coffee machines to lighting and laser printers.
