

Join Bulgin at electronica 2024

[Bulgin](#) – a leading manufacturer of environmentally sealed connectors and components – will be showcasing its broad range of connectors and switches on [stand B2.443](#) at [electronica 2024](#). This annual event, taking place in Munich from the 12th to the 15th of November, will give delegates the chance to explore Bulgin's [portfolio of electronic components](#) – including the popular Buccaneer® series of environmentally-sealed connectors – and learn how the company can provide [custom solutions](#) tailored to specific needs.

Visitors to the Bulgin stand will have the opportunity to talk to technical experts and learn about the company's wide portfolio of IP67, IP68 and IP69K rated power, data and fibre connectors designed for use in a wide range of marine, industrial, transport and infrastructure applications. The Bulgin team will also be showcasing connectors in action in a sensor environment, using a drone equipped with a hopper to 'sense' when to dispense the cargo.

electronica 2024

German Casillas, Managing Director at Bulgin, said: “We are excited to be attending electronica and showcasing our extensive range of connectors and switches. We especially look forward to connecting with both current and future customers, and discussing how we can help them with their applications needs.”
