

Bulgin to launch M-Series interconnects at Electronica 2016

Bulgin will be unveiling a new range of industrial automation components on **stand B2.271** at this year's electronica exhibition. This bi-annual event, which takes place from the 8th to the 11th of November in Munich, will be the first opportunity to see the new M-Series interconnects, which have been designed to offer flexible connectivity solutions for a variety of rugged automation applications.

The M-Series includes a range of sizes and pin configurations – from 3 to 19 pins – and is designed for use in industries requiring exceptionally reliable and robust connections, from automotive production and machine building to food and beverage processing. A variety of connector types and keying options are available – as well as both straight and right-angled versions – providing end-to-end automation connectivity for almost any situation.

To find out more about the M-Series interconnects, as well as the complete range of Bulgin products, visit Bulgin on **stand B2.271** or email info@bulgin.com.
